DETAILED ACTION

Claims 1-7 are currently pending.

Election/Restriction

1. Claim 1 is generic to a plurality of disclosed patentably distinct methods of treatment/prophylaxis of a parkinson's patient by elevating amounts (e.g. by administering) of the following compound species:

- a. GPE
- b. Prodrug of GPE
- c. GPE analog
- d. Prodrug of a GPE analog
- e. GPE mimetic
- f. Prodrug of a GPE mimetic .

The above methods of using (e.g. treatment/prophylaxis of Parkinson's "functional symptoms") compounds a-f result in patentably distinct methods in view of the use of patentably distinct compounds. Compounds a-f, are patentably distinct due to differences in structure and/or function and/or physicochemical/biological properties and are capable of separate manufacture and/or use and require different and separately burdensome manual and/or computer bibliographic/structural/classification searches.

Art Unit: 1639

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, and indicate what claims are readable thereon, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
